

# Salt and Sand Bins

Durable, attractive and reliable

**Reliability**  
- proven design,  
no metal parts

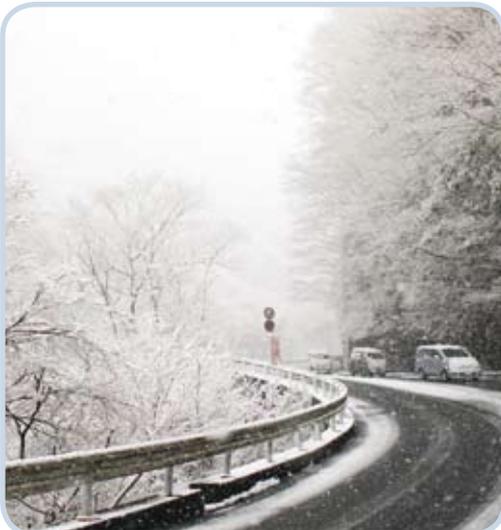

**Profiled lid**  
- specially profiled  
bin lid ensures easy  
and predictable  
runoff of  
rain water

**Durability**  
- strong  
and rigid  
construction

## → Reasons to use Titan's sand and salt bins:

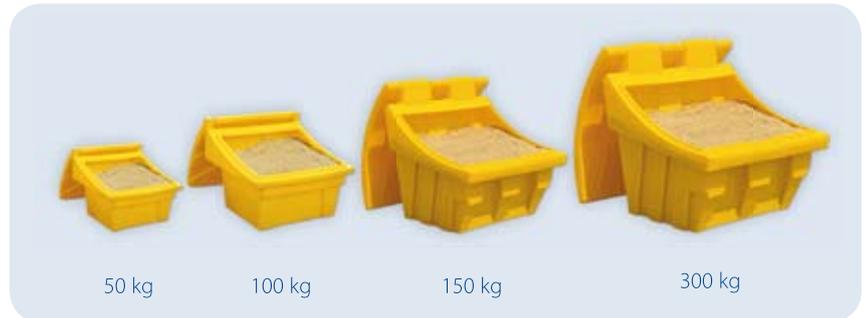

- **Design.** Unique structure, innovative design. The bins can be placed in almost any pedestrian traffic area.
- **Durability.** Strong and rigid construction, top quality polyethylene and state-of-the-art technology make the bins extremely resistant to mechanical damage and poor weather. UV stabilized, they won't fade in the sun. Having no metal components they are extremely light and non-corroding. The bins are an ideal solution for storing other materials used to protect roads and pavements, e.g. absorbing agents.
- **Colours.** The standard sand and salt bins are available in yellow, green, blue.
- **Cost effectiveness.** The bins can be transported by forklift, which facilitates their handling and storage. When empty and off-season, they can be stacked to take up little space.
- **Safety and hygiene.** The sand and salt bins manufactured by Titan have been certified by the National Institute of Hygiene.
- **Technical consulting.** Our sales team provides quick and professional answers to any question.
- **Warranty\*.** All Titan tanks are covered by a five-year warranty; the equipment carries a one-year warranty.

\* The warranty applies to the product used in accordance with the manufacturer's recommendations.

## Sand and Salt Bins

Sand and salt bins are designed for storing salt, grit and sand in pedestrian traffic areas: at bus and tram stops, railway stations, car parks etc.

Product code	Bin	Capacity [kg]	Length [m]	Width [m]	Height [m]
SGB00050*	GB 50	50	0.59	0.57	0.50
SGB00100*	GB 100	100	0.72	0.69	0.60
SGB00150*	GB 150	150	0.86	0.75	0.81
SGB00300*	GB 300	300	1.09	0.95	1.01

Product dimensions may vary within +/- 1%.

\* Code ending depends on product colour – YE - yellow, RE - red, GN - green, BU - blue.

- **Reliability** - proven design, no metal parts.

- **Profiled lid** - specially profiled bin lid ensures easy and predictable runoff of rain water.

- **Durability** - strong and rigid construction.
