

# Waste Oil Tanks

Designed to collect used oil in petrol stations, service stations, depots, workshops and harbours

## ➔ Reasons to use Titan's waste oil tanks:

- **Durability.** The tanks are made from top-quality polyethylene. Rigid construction makes them resistant to mechanical damage.
- **Safe use.** The advanced banded design provides an excellent protection against leaks.
- **Simple installation.** Does not require any subbase, casing, collector tanks or special connections.
- **Warranty.** All Titan banded tanks are covered by a ten-year warranty; the equipment carries a two-years warranty\*.

### STANDARD EQUIPMENT

- Banded tank made of polyethylene, UV stabilised.
- Special inlet with a lockable lid holding up to 20 litres with a metal strainer.
- Oil consumption ferrule adapted for a 2" Camlock connection (direct connection to a tanker).
- 1 ½" female threaded ferrule.
- 2" female threaded ferrule with a vent.
- Leak detection sensor.

### OPTIONAL EQUIPMENT

- Wireless oil level sensor with display (Watchman Plus).

Leakage signaling device

special inlet with a lockable lid

Waste oil tanks with Tidytop covers are a complete solution for the collection of oil and its packaging.

## Waste Oil Tanks

Waste oil tanks are designed to collect used engine oils in places where they become waste, such as car parks, service stations, bus and truck depots, oil refill points, marinas, harbours, shipyards and landfills.

Product code	Capacity [l]	Length [m]	Width [m]	Height [m]
BW000200DG	200 l	0.76	0.76	1.25
BW000600DG	600 l	1.44	0.85	1.30
BW001000DG	1000 l	2.22	0.76	1.55
BW001300DG	1200 l	1.90	1.24	1.45
BW002500DG	2500 l	2.46	1.46	1.60

Product dimensions may vary within +/- 1%.

### Tidytop covers

Our covers are an economical way to change a standard 205-litre metal drum into an efficient container for collecting specific types of waste. Also perfectly suitable for the collection of used car filters.

- **Two-part construction** – with a removable top part.
- **Assembly** – the base can be permanently attached to the ground.
- **Size** – suitable for the standard 205l drums.
- **Safety** – it is possible to install a lock to prevent unauthorised access.
- **Design** – available in a variety of colours, the covers can either blend in or stand out from their environment as required.

\*The warranty applies to the product used in accordance with the manufacturer's instructions.
