

BlueMaster® Basic

Tanks for Storage and Dispensing of AdBlue®

BlueMaster® is used in many sectors, including transport, industry and agriculture. BlueMaster® is the perfect solution for the safe storage and distribution of AdBlue®. Thanks to its unique features BlueMaster® is operated by companies having machines with SCR (Selective Catalytic Reduction), such as transportation and construction companies, distribution and logistics centers as well as agricultural producers.

ADVANTAGES:

- › Simple and reliable design.
- › Easy maintenance.
- › Distribution system based on proven submersible pumps.
- › Variety of shapes and volumes up to 15 000 L.
- › Visible liquid level.
- › Low price.

Comprehensive range of single skin tanks for storage and distribution of AdBlue®

- SPECIFICATION:**
- > Single skin tank.
 - > Submersible pump.
 - > PIUSI automatic nozzle (TUV approval needed for Germany).
